**SMART®**

# SMART
# Electric Height-Adjustable Stands

Add flexibility to any SMART Board® display with industry-leading height adjustment to support a variety of learning and collaboration environments.

## Mobile | Wall

### Mobile Stand
Create interactive spaces anywhere – from large halls to small-group areas.

### Wall Stand
Avoid expensive wall reinforcement by transferring the weight of the display to the floor.

**Fits all SMART Board** series and sizes up to **86"**

*Available in EMEA only*

**ADA compliant**
**5-year warranty**

# Choose the installation solution that works for you

No matter where you're looking to add interactive learning or collaboration – gymnasiums, auditoriums, meeting rooms, classrooms, libraries, huddle rooms or maker spaces – SMART has you covered.

**Electric height adjustment** eliminates ongoing maintenance required with manual stands.

**Industry-leading height range** means anyone can create content anywhere on the display.

**Safety stop** halts height adjustment of the stand when an object is encountered.

**Dual-column design** provides extra stability when interacting with or moving the display.

**Rear cabinet** stores cables and accessories with a side-mounted, surge-protected power bar for only one cord to plug into the wall.

**Wired remote** control means anyone can quickly and easily adjust the stand.

**Multiple VESA mounting points** support Mini-PCs and other peripherals.

**ADA compliant,** V-style mobile base provides access to all users, including those in wheelchairs.
